E-Procurement applications help streamline business operations and ease the purchasing process. It introduces considerable efficiency improvements through automated procurement process, improved inventory control, decreased order errors and order cycle time. E-Procurement systems also allow organizations to optimize transfer and processing costs

## **3. Website Hosting and Domain Registration:**

A web hosting service is a type of Internet hosting service that allows individuals and organizations to make their website accessible via the World Wide Web. Web hosts are companies that provide space on a server owned or leased for use by clients, as well as providing Internet connectivity, typically in a data centre. We realize that technology plays an important role in the web hosting industry. To ensure the highest levels of reliability, uptime, and performance, we use the best technology possible and only work with quality suppliers.

- We Host Websites and E-mails developed by us for free for one year
- Our basic Web hosting plans starts from Rs 99pm with 24/7 uptime.
- We help our customers in getting the right domain purchased which intact helps for the organisational cause and also Google Search Engine optimization

## 4. Security Systems:

Home security is a priority for the homeowner today. With the rise in home invasion crimes (theft and the like), it is extremely important that whatever protection you can get. Ocsid security systems are designed for such a reason with latest innovations in technology, with the numerous products of this kind available in the market; Ocsid Security Systems are still unique with its Special Features

Ocsid Security Systems is with the Latest Innovations, unlike Security Systems that are directly wired into the house causing fitting damages to the home and home decorations. Ocsid Security System offer much greater flexibility than traditional wired systems. Ocsid installed wireless home security system is a less invasive option that the other options on the market. They can be configured to almost every home will be determined and are endlessly flexible (meaning that they grow with your needs).

### Advantages of Ocsid Security System

- In addition to its greater flexibility and ease of configuration, Ocsid home security system includes some great ways that some wired systems cannot begin to touch each other. Vibration detectors and Fog Detectors are the added advantages and with the feature of adding sensors if required In addition, our Security System digitally monitors driveway (windows and doors)
- A battery-backup power supply. These power supplies are usually for about 12 hours of monitoring, when larger capacity batteries are available. In this way, if the power goes out, you know that your home is safe and will secure.
- A special feature of auto-dialling will invoke a call to the preset number during the intrusion
